

THE SPRING RESET

Everything the snow was hiding.

Four months of winter comes back in about a week. The worst yard of the year, and the one nobody wants to be the person who does.

\$100

One visit. Whole yard. Gone.

Flat, no plan required, any condition. Or free with any plan instead.

Not a bigger normal week.

Waste that froze in December did not break down, it paused. When the ground softens it all becomes live at once, on grass with no root strength left. That is the window where a yard goes from neglected to damaged.

We find the buried

Under leaf fall, along the fence line, and in the beds where the drift sat all winter. Not just the open lawn.

No commentary

We have done every kind of March yard there is. Nobody is going to say anything about yours.
